

Heat Alert! Severe heatwaves push temperatures $> 47^{\circ}\text{C}$. 95 of the world's 100 hottest cities are located in India.

WANT TO BUILD GREEN But unsure of where to start?

Hot and Sweltering

Source: <https://geospatialworld.net/prime/special-features/record-breaking-heat-islands-across-north-west-india/>

Who is Mapping the HEAT ?

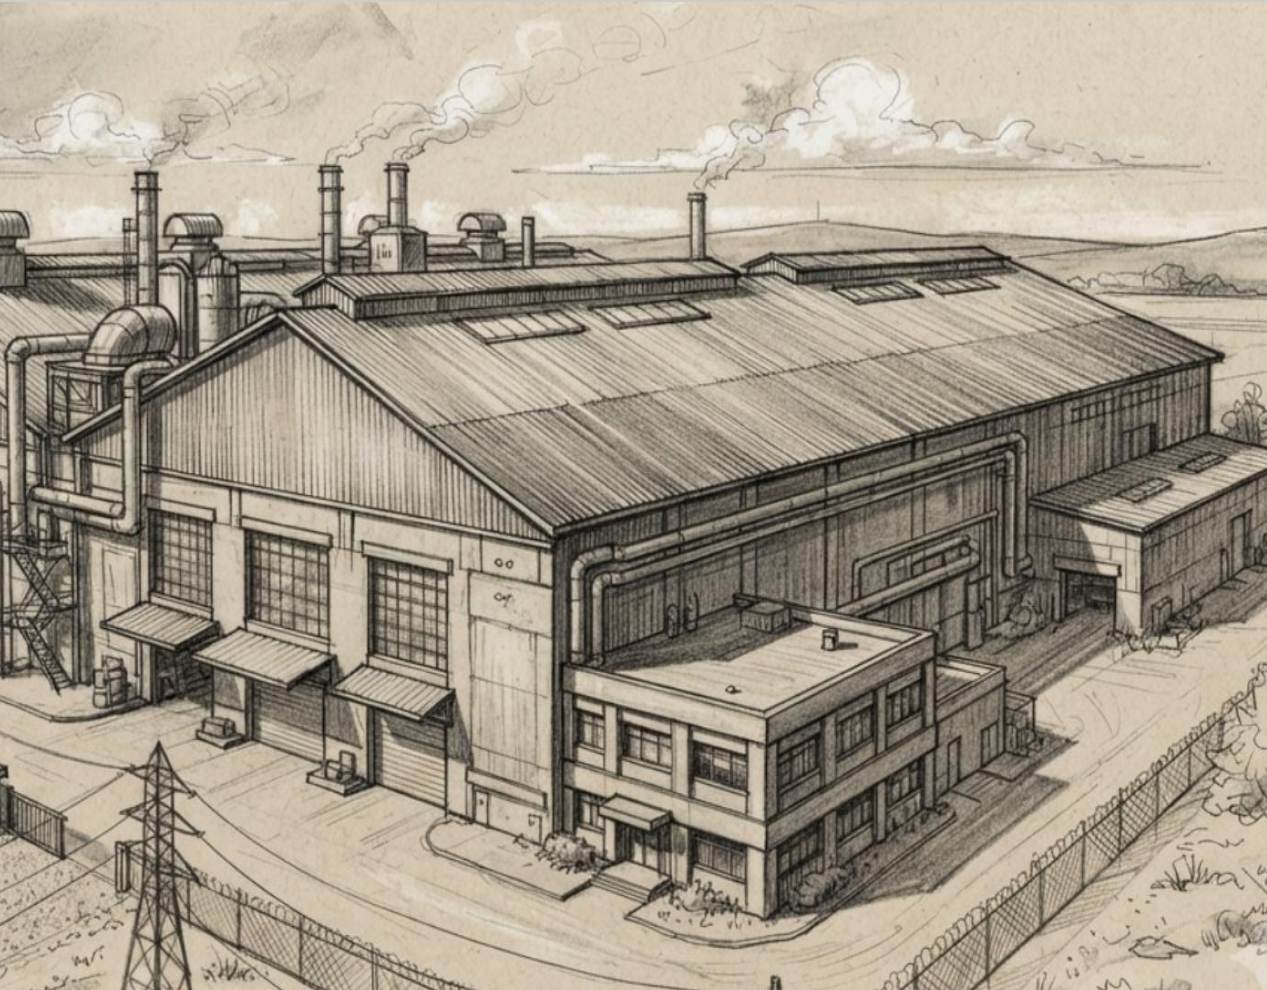

Land Surface Temperature (LST) is measured by satellites (infrared sensors) and is the **actual temperature** of :

- Ground,
- Building Roofs
- Pavements
- Asphalt

“Urban Heat Island effect, (UHI)” happens as city level surfaces absorb heat, raising the effective outdoor temperature, that increases (LST)

During PEAK summer days
Asphalt temperature can hover between
55°C to 70°C.

If you own Factories...

or a large Construction Site

But your facility is a Heated Metal Container ... then you will like our solution ...

Your Factory is a - “Brand Showcase Center”

NZ Factory Features

Reception,
Executive Rooms,
Conference, Utilities
& Production
Spaces

Insulated Pre-
Fab Panels
Fast
Construction

Plaster Free
Interior
Innovative
Cooling

Near Net
Zero
Energy

10,000 sft +
Custom design
options
available!

Your site Office can be a “**Brand Showcase Center**”, not a **Hot Metal Oven** !
Let's connect for your, **Net Zero Pod** ...
